
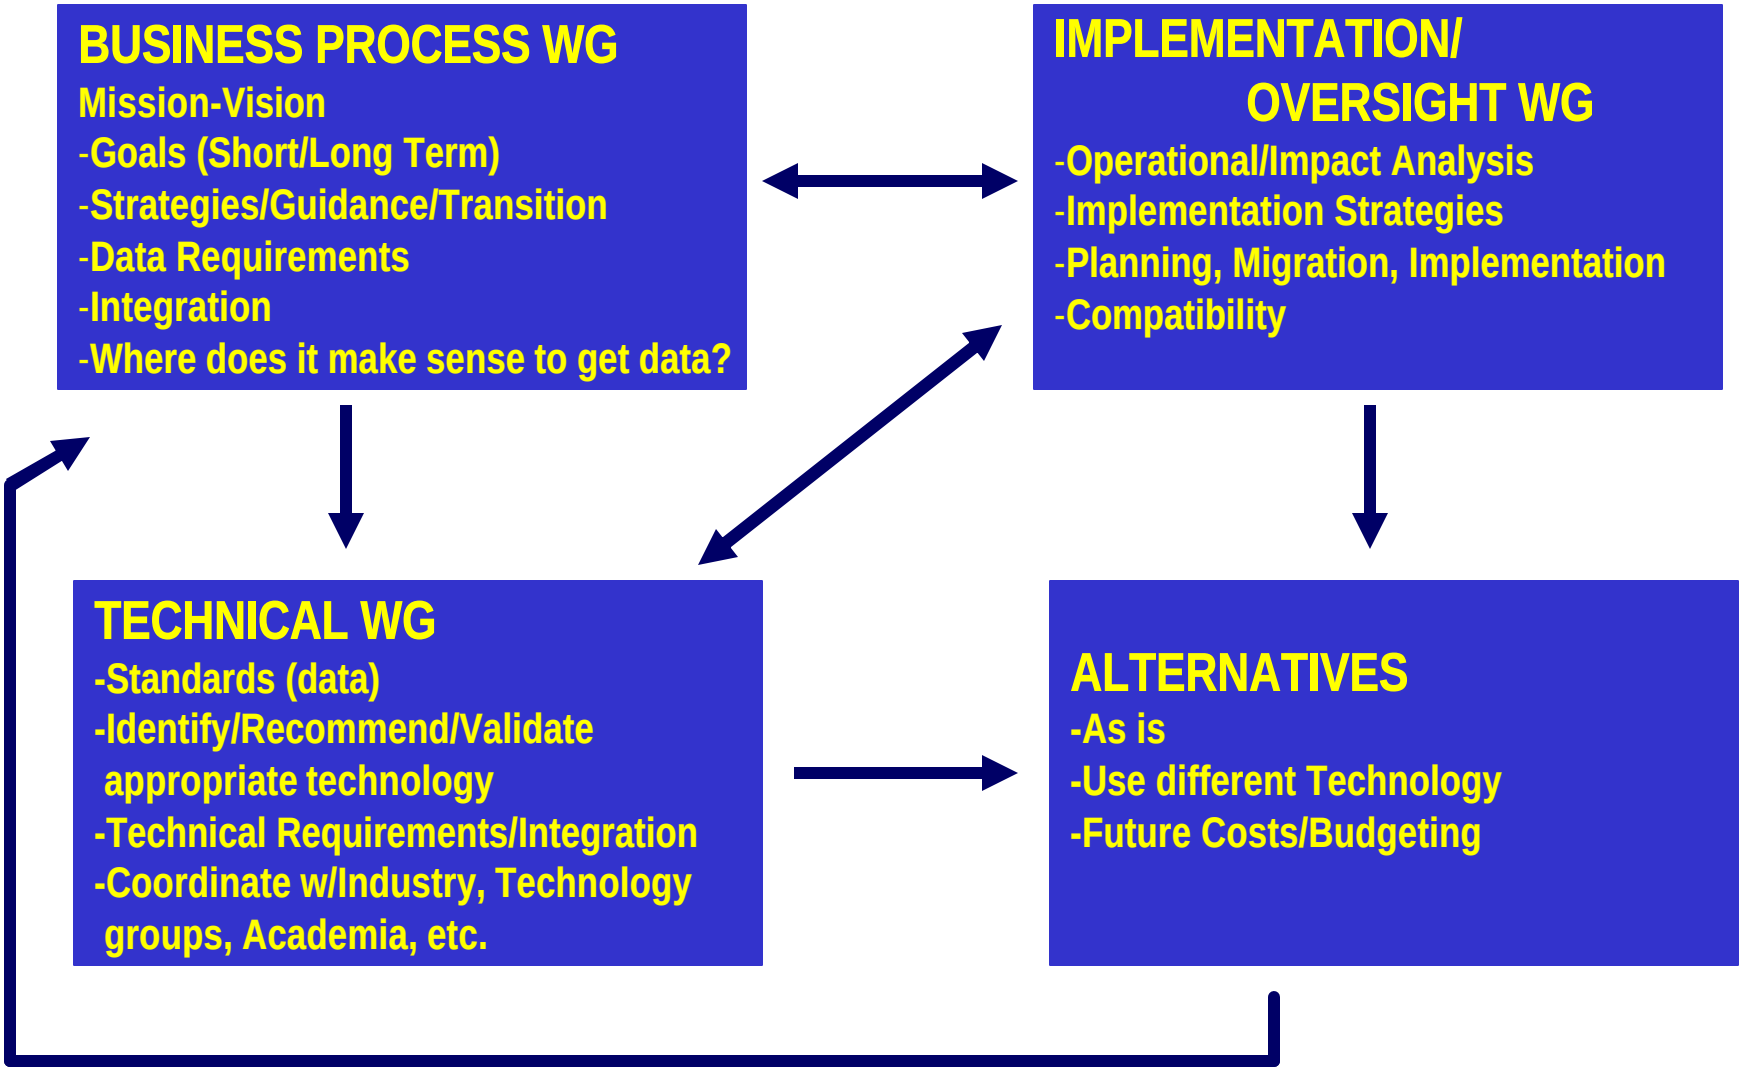
# *DOD RFID Business Process Working Group*

**October 22/23, 2003**

# Business Process Working Group



# Business Process Working Group

Processes are generally identified in terms of beginning and end points, interfaces and organizational involvement, particularly the customer

- Installing an RFID System is a black art
- Existing IT Infrastructure need to be upgraded
- Transition from old way of doing business…a mind-set that will require change
- Extend efficiencies to all areas of Supply Chain (not just supply and transportation)
- Collect real-time data

**Computers…power to crunch a tremendous amount of data**
**Internet…provides the means to share data seamlessly**
**RFID…provides the ability to collect data automatically.**

# DOD RFID IPT Work Group Goals

- **Work Group Goals:**
  - Review, amend and validate Group goals, tasks and Charter
  - Establish outline plan of meetings, teleconferences, activities
  - Establish list of working group deliverables
  - Validate membership – establish key POC list
  - Identify additional requirements for technical or SME support
    - Military Services or Agencies
    - Commercial industry
  - Identify group procedures, formats, and any software required
  - Identify and areas requiring support from other working groups

**We want this group to be the visionaries. Where would you put RFID?**

# DOD RFID IPT Work Group Goals

- 7 November (Oversight & Implementation WG, Business Process WG meeting)
- Meeting Frequency (every 2 weeks):
  - 19 Nov
  - 3 Dec
  - 17 Dec

**We want this group to be the visionaries. Where would you put RFID?**
